

For our office in Dubai we are looking for a **Senior Façade Consultant/Façade Project Manager**

Your role

- Supporting our successfully growing Dubai façade team in the role of a senior façade consultant with project management and site inspection experience of façade projects.

Your tasks

- Lead façade and special structures projects with responsibility for the communication with the client, coordination with our in-house façade designers and façade structural engineers, control the quality of our façade engineering deliverables incl. façade drawings, reports and specifications, overview of the commercial success of the project
- Communicate directly with architects and clients on façade technical and commercial issues
- Produce façade related reports and specifications with different cladding materials
- Review or carry out typical façade structural calculations (e.g. mullion or glass design)
- Besides site inspections, occasionally carry out factory inspections, submittal reviews and tender documents for façade projects
- Being client focused and understand client's needs

Your qualifications

- Background in the façade industry working for façade consultants (preferred) or façade contractors
- Minimum 8 years experience with a façade consultancy firm or contractor
- Degree in Façade Engineering or Structural Engineering, or similar proof of experience of façade system structural design (at least basic design)
- Be familiar with agreed fees / scope of services / program
- Having experience in carrying out site, factory and façade mock-up (PMU) inspections
- Being able to work under pressure of tight submission deadlines and coordinate with the Façade Director

Your benefits

- Interesting and challenging job in a highly motivated global team of experts
- Performance-related salary
- Personal development opportunities with training programs
